Communications en congrès internationaux

Coppin F, et al. Distribution and availability of radiocesium in Fukushima forest soils *ICOBTE 2015 (13th International Conference on the Biogeochemistry of Trace Elements)*, Fukuoka, 12-16 july 2015 (symposium "Understanding and mitigating the environmental behaviour of radiocaesium after the Fukushima accident")

Delmas M, et al. Estimating average wash-off parameters of cesium from watersheds of Minamisoma region (Fukushima prefecture) by a Bayesian approach. *ICOBTE 2015 (13th International Conference on the Biogeochemistry of Trace Elements)*, Fukuoka, 12-16 july 2015 (symposium "Understanding and mitigating the environmental behaviour of radiocaesium after the Fukushima accident")

Evrard, O. et al. Tracking the dispersion of particle-borne radioactive contamination along coastal rivers of Fukushima Prefecture (2011–2014). *ICOBTE 2015 (13th International Conference on the Biogeochemistry of Trace Elements)*, Fukuoka, 12-16 july 2015 (symposium "Understanding and mitigating the environmental behaviour of radiocaesium after the Fukushima accident")

Eyrolle-Boyer F, et al. $^{134}$Cs and $^{137}$Cs activities in rivers of the Minami-Soma region (Fukushima) in october-november 2013. *ICOBTE 2015 (13th International Conference on the Biogeochemistry of Trace Elements)*, Fukuoka, 12-16 july 2015 (symposium "Understanding and mitigating the environmental behaviour of radiocaesium after the Fukushima accident")

Gonze MA, et al. Modelling of Radiocaesium Dynamics and Associated Ambient Dose Rates in Fukushima Coniferous Forests. *ICOBTE 2015 (13th International Conference on the Biogeochemistry of Trace Elements)*, Fukuoka, 12-16 july 2015 (symposium "Understanding and mitigating the environmental behaviour of radiocaesium after the Fukushima accident")

Hurtevent P, et al. $^{137}$Cs distribution and recycling in two Japanese Cedars stands 3 years after the FDNPP accident. *ICOBTE 2015 (13th International Conference on the Biogeochemistry of Trace Elements)*, Fukuoka, 12-16 july 2015 (symposium "Understanding and mitigating the environmental behaviour of radiocaesium after the Fukushima accident")

Lepage, H., et al. The application of the sediment fingerprinting technique to trace the origins of particle-borne radioactive contamination in two coastal rivers of the Fukushima Prefecture.

Loffredo N, et al. Modeling the $^{137}$Cs leaching dynamic from evergreen canopies after a radiocesium deposit ICOBTE 2015 (13th International Conference on the Biogeochemistry of Trace Elements), Fukuoka, 12-16 July 2015 (symposium "Understanding and mitigating the environmental behaviour of radiocaesium after the Fukushima accident")

Loffredo N, et al. Modeling the $^{137}$Cs leaching dynamic from evergreen canopies after a radiocesium deposit, Tsukuba Global Science Week, 28-30 September 2015 (Natural disasters prevention and management).
