

Travaux du Comité 3  
Rapports récents et projets  
JM COSSET

- ❑ General topics and initial discussion on the work to be done in the next 4 years (TG and WP to be proposed)
- ❑ The following topics were discussed as possible future documents to be prepared by the corresponding Task Groups (TG) or Working Parties (WP) (the final list approved is presented as part of the item 7 of these minutes):

Radiotherapy

Nuclear medicine

Diagnostic radiology

Other

## RADIOTHERAPY:

- ❑ Radiological Protection issues of modern radiotherapy techniques  
*TG chaired by LV Pinillos or JM Cosset.*
- ❑ RP for radiosurgery (including gamma knife)  
*TG chaired by LV Pinillos*
- ❑ Secondary cancers with new techniques vs. old. To be discussed.

## **NUCLEAR MEDICINE:**

- Dosimetry of Radiopharmaceuticals  
*(S. Mattsson TG follow up)*
  
- Occupational (and hand doses) RP in Radiopharmaceuticals  
*WP J. Liniecki*

## **DIAGNOSTIC RADIOLOGY:**

- Radiation protection for fluoroscopically guided cardiac procedures

*TG Claire Cousins*

- Paediatric Radiology including CT

*Hans Ringertz TG*

- New CT (annex to the previous ICRP document).

*M. Rehani WP*

## OTHER:

- Medical aspects of nuclear terrorism  
*(IA Gusev)*
  
- Medical Legal Exposures  
*(C Sharp with C4)*
  
- Screening (M Rehani / F Mettler) Medical follow up of  
 accidentally exposed persons  
*F Mettler WP*
  
- Training of medical users of radiation.  
*Possible WP (to be discussed)*

- Approval of the report “Radiation Safety and release of patient after therapy of patients with permanently implanted source”

(Protection du patient atteint d'un cancer de la prostate traité par des sources radioactives implantées de façon permanente)

*TG. JM Cosset*
