

Publications du BEHRIG depuis 2011

2011

- Bardet L., Duluc C. M., Rebour V., & L'Her J., (2011). Regional frequency analysis of extreme storm surges along the french coast. Natural Hazards and Earth System Science, 11(6), 1627-1639, <https://doi.org/10.5194/nhess-11-1627-2011>

2012

- Abily M., Duluc C.-M., Gourbesville P., (2012) : Use of standard 2D numerical modeling tools to simulate surface runoff over an industrial site – feasibility and comparative performance survey over a test case. SIMHYDRO proceedings 2012: New trends in simulation Hydroinformatics and 3D modeling
- Bardet L., et Duluc C.-M., (2012): Apports et limites d'une analyse statistique régionale pour l'estimation de surcotes extrêmes en France. SHF proceedings : «Evènements extrêmes fluviaux et maritimes», Paris, 1-2 février 2012.
- Duluc C.-M., Deville Y. et Bardet L., (2012): Extreme sea level assessment: application of the joint probability method with a regional skew surges distribution and uncertainties analysis. SHF proceedings : «Evènements extrêmes fluviaux et maritimes», Paris, 1-2 février 2012.

2013

- Abily M., Duluc C.-M., Faes J.-B. & Gourbesville P., (2013). Performance assessment of modelling tools for high resolution runoff simulation over an industrial site. Journal of Hydroinformatics. IWA PUBLISHING,15(4) pp. 1296–1311.
- Abily M., Gourbesville P., Andres L., Duluc C.-M., (2013): Photogrammetric and LiDAR data for high resolution runoff modeling over industrial and urban sites. 35th IAHR World Congress, 8-13 septembre 2013, Chengdu (Chine) et Congrès IAHF 2013, Chengdu (Chine).
- Nguyen T., Richet Y., Balayn P., Bardet L., (2013): Propagation des incertitudes dans les modèles hydrauliques 1D. Uncertainties propagations in 1D hydraulic modeling. SHF proceedings: «Evènements extrêmes d'inondation 2013», Paris, 13-14 novembre 2013

2014

- Abily M., Delestre O., Amosse L. et al., (2014): Use of 3D classified topographic data with Full LSWOF for high resolution simulation of a river flood event over a dense urban area. Congrès IAHF 2014, Porto, Portugal.
- Abily M., Delestre O., Bertrand N. et al., (2014): Global Sensitivity Analysis with 2D hydraulic codes: application on uncertainties related to high resolution topographic data. In SIMHYDRO 2014: Modelling of rapid transitory flows, 11-13 juin 2014, Sophia Antipolis (France). https://doi.org/10.1007/978-981-287-615-7_21
- Duluc C.-M., Bardet L., Guimier L., Rebour V. (2014): Un nouveau guide sur la protection des installations nucléaires contre l'inondation d'origine externe. La Houille Blanche, 5, 47-53, <https://doi.org/10.1051/lhb/2014049>
- Duluc C.-M., Deville Y., and Bardet L. (2014): Extreme sea level assessment: application of the joint probability method at Brest and La Rochelle and uncertainties analysis, La Houille Blanche, 1, 11–17, <https://doi.org/10.1051/lhb/2014002>.
- Hamdi Y., Bardet L., Duluc C.-M. and Rebour V. (2014): Extreme storm surges: a comparative study of frequency analysis approaches. Nat. Hazards Earth Syst. Sci., 14, 2053-2067, <https://doi.org/10.5194/nhess-14-2053-2014>

2015

- Abily, M., Delestre, O., Amosse, L. et al., (2015): Uncertainty related to high resolution classified topographic data use for flood event modeling over urban areas: A sensitivity analysis based approach, ESAIM: PROCEEDINGS AND SURVEYS, 48, 385-399, <http://dx.doi.org/10.1051/proc/201448018>.
- Abily M., Delestre O., Bertrand N. et al., (2015): 2D High resolution river flood simulation in urban environment: Global sensitivity analysis for spatial ranking of uncertain parameters. 22nd Canadian Hydrotechnical Conference :

Publications du BEHRIG depuis 2011

Water for Sustainable Development : Coping with Climate and Environmental Changes. Canadian Society of Civil Engineering, Montreal, Quebec, April 29 – May 2, 2015.
